

CHECKMATE

The winning move is not to play at all
Just pack it up and accept that life goes on
Forget the lies that you've been told
Just keep on down that winding road
Till you reach where it is you're going

You were tired of playing a losing game
It's 4D chess and now you've called checkmate
'Cause you're long gone
Long gone, you're long gone

You'll be turned away by those you seek to save
And in time they'll learn to open up their minds again
You don't care about the winning
No, that ain't why you're in it
But you're in it for the love that's hard to stay

You were tired of playing a losing game
It's 4D chess and now you've called checkmate
'Cause you're long gone
Long gone, you're long gone

What's the price of tomorrow
No one can really say
When you can't even save enough today
When you put it to the test
Oh there is no second best
Just only one path left to walk away

You were tired of playing a losing game
It's 4D chess and now we've called checkmate
'Cause we're long gone
Long gone, we're long gone
Long gone, we're long gone
Long gone, we're all long gone
